Links

Tables

# Sectioning

# Sectioning

Sectional commands have the following two forms:

`\section {}` Numbered sections.

`\section *{}` Unnumbered sections.

# Types of Lists

There are three types of lists in  $\text{\LaTeX}$ :

- ▶ `itemize.`
- ▶ `enumerate.`
- ▶ `description.`

# Types of Lists

Syntax:

```
\begin{itemize}[align=left]
    \item Naruto Uzumaki.
    \item Sakura
    \item Sasuke Uchiha.
\end{itemize}
```

# How do I modify lists?

Use a package called `enumitem`.

It lets us change:

- ▶ Labels.
- ▶ Margins.
- ▶ Alignment.
- ▶ Direction (vertical or inline).

# How do I insert links?

Use the command `\url` or `\href`

We can refer to internal objects by: `\href {item-label}{text}`

# How do I insert links?

## Four types of links

# How do I insert links?

## Four colors

- ▶ `link`
- ▶ `url`
- ▶ `cite`
- ▶ `file`

# How do I insert links?

:

- ▶ `linkcolor`
- ▶ `urlcolor`
- ▶ `citecolor`
- ▶ `filecolor`
- ▶ `linkbordercolor`
- ▶ `urlbordercolor`
- ▶ `citebordercolor`

# General rules to typeset tables

1. Never use vertical lines.
2. Avoid double lines.
3. Place the units in the headings.
4. Don't use quotation marks to repeat content.
